

CUSTOMER CHURN PREDICTION REPORT

Project: AI Customer Churn Predictor | Date: May 19, 2026 12:27 PM

Executive Summary

Total Predictions	27	Churn Rate	70.4%
High Risk Customers	18	Safe Customers	8
Most Used Classifier	SVM	Records in Report	27

Prediction Details

Prediction #1 — 2026-05-19 12:26:51

Selected Model		SVM		Prediction		Likely to Churn	
Probability		99.7%		Risk Level		High	
Age	24	Gender	Female	Tenure (mo.)	12		
Usage Freq.	21	Support Calls	0	Payment Delay	5		
Subscription	Premium	Contract	Quarterly	Total Spend	\$230		
Last Interaction	0						

Retention Suggestions

- Schedule a check-in call to understand their needs better.

Prediction #2 — 2026-05-19 12:15:33

Selected Model		SVM		Prediction		Likely to Churn	
Probability		100.0%		Risk Level		High	
Age	23	Gender	Female	Tenure (mo.)	12		
Usage Freq.	14	Support Calls	0	Payment Delay	3		
Subscription	Standard	Contract	Quarterly	Total Spend	\$2300		
Last Interaction	4						

Retention Suggestions

- Schedule a check-in call to understand their needs better.

Prediction #3 — 2026-05-17 18:35:47

Selected Model	SVM	Prediction	Likely to Stay
Probability	29.0%	Risk Level	Low

Age	30	Gender	Female	Tenure (mo.)	12
Usage Freq.	23	Support Calls	1	Payment Delay	0
Subscription	Basic	Contract	Quarterly	Total Spend	\$456
Last Interaction	2				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #4 — 2026-05-17 18:25:33

Selected Model	SVM	Prediction	Likely to Churn
Probability	100.0%	Risk Level	High

Age	23	Gender	Male	Tenure (mo.)	12
Usage Freq.	21	Support Calls	0	Payment Delay	0
Subscription	Basic	Contract	Monthly	Total Spend	\$300
Last Interaction	0				

Retention Suggestions

- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #5 — 2026-05-16 18:37:22

Selected Model	SVM	Prediction	Likely to Churn
Probability	100.0%	Risk Level	High

Age	23	Gender	Male	Tenure (mo.)	12
Usage Freq.	23	Support Calls	2	Payment Delay	1
Subscription	Premium	Contract	Quarterly	Total Spend	\$234
Last Interaction	12				

Retention Suggestions

- Schedule a check-in call to understand their needs better.

Prediction #6 — 2026-05-16 16:37:54

Selected Model		Logistic Regression		Prediction	Likely to Churn
Probability		99.9%		Risk Level	High
Age	23	Gender	Female	Tenure (mo.)	12
Usage Freq.	23	Support Calls	1	Payment Delay	1
Subscription	Standard	Contract	Monthly	Total Spend	\$233
Last Interaction	2				

Retention Suggestions

- Promote yearly subscription discounts to increase commitment.

Prediction #7 — 2026-05-16 16:26:25

Selected Model		Logistic Regression		Prediction	Likely to Churn
Probability		99.5%		Risk Level	High
Age	32	Gender	Male	Tenure (mo.)	12
Usage Freq.	30	Support Calls	1	Payment Delay	0
Subscription	Standard	Contract	Monthly	Total Spend	\$344
Last Interaction	1				

Retention Suggestions

- Promote yearly subscription discounts to increase commitment.

Prediction #8 — 2026-05-16 16:24:27

Selected Model		Logistic Regression		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #9 — 2026-05-16 16:24:27

Selected Model		KNN		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #10 — 2026-05-16 16:24:27

Selected Model		Naive Bayes		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #11 — 2026-05-16 16:24:27

Selected Model		SVM		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #12 — 2026-05-16 16:22:18

Selected Model		Logistic Regression		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #13 — 2026-05-16 16:22:18

Selected Model		KNN		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #14 — 2026-05-16 16:22:18

Selected Model		Naive Bayes		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #15 — 2026-05-16 16:22:18

Selected Model		SVM		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Male	Tenure (mo.)	12
Usage Freq.	15	Support Calls	3	Payment Delay	5
Subscription	Basic	Contract	Monthly	Total Spend	\$250
Last Interaction	10				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Promote yearly subscription discounts to increase commitment.
- Recommend premium features with a free 1-month trial.

Prediction #16 — 2026-05-16 16:21:51

Selected Model		KNN		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	23	Gender	Male	Tenure (mo.)	22
Usage Freq.	23	Support Calls	12	Payment Delay	1
Subscription	Basic	Contract	Quarterly	Total Spend	\$233
Last Interaction	3				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Recommend premium features with a free 1-month trial.

Prediction #17 — 2026-05-16 15:41:40

Selected Model		SVM		Prediction	Likely to Stay
Probability		10.5%		Risk Level	Low
Age	49	Gender	Female	Tenure (mo.)	38
Usage Freq.	24	Support Calls	4	Payment Delay	0
Subscription	Premium	Contract	Quarterly	Total Spend	\$829
Last Interaction	10				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #18 — 2026-05-16 15:41:17

Selected Model		Naive Bayes		Prediction	Likely to Stay
Probability		0.0%		Risk Level	Low
Age	49	Gender	Female	Tenure (mo.)	38
Usage Freq.	24	Support Calls	4	Payment Delay	0
Subscription	Premium	Contract	Quarterly	Total Spend	\$829
Last Interaction	10				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #19 — 2026-05-16 15:41:08

Selected Model		KNN		Prediction	Likely to Stay
Probability		20.0%		Risk Level	Low
Age	49	Gender	Female	Tenure (mo.)	38
Usage Freq.	24	Support Calls	4	Payment Delay	0
Subscription	Premium	Contract	Quarterly	Total Spend	\$829
Last Interaction	10				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #20 — 2026-05-16 15:40:55

Selected Model		Logistic Regression		Prediction	Likely to Stay
Probability		23.5%		Risk Level	Low
Age	49	Gender	Female	Tenure (mo.)	38
Usage Freq.	24	Support Calls	4	Payment Delay	0
Subscription	Premium	Contract	Quarterly	Total Spend	\$829
Last Interaction	10				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #21 — 2026-05-16 15:39:31

Selected Model		Logistic Regression		Prediction	Likely to Stay
Probability		37.2%		Risk Level	Low
Age	30	Gender	Female	Tenure (mo.)	239
Usage Freq.	14	Support Calls	5	Payment Delay	18
Subscription	Standard	Contract	Annual	Total Spend	\$932
Last Interaction	17				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #22 — 2026-05-16 15:39:11

Selected Model		SVM		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	30	Gender	Female	Tenure (mo.)	239
Usage Freq.	14	Support Calls	5	Payment Delay	18
Subscription	Standard	Contract	Annual	Total Spend	\$932
Last Interaction	17				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Offer flexible payment options or a one-time late fee waiver.

Prediction #23 — 2026-05-16 15:38:59

Selected Model		Naive Bayes		Prediction	Likely to Stay
Probability		0.2%		Risk Level	Low
Age	30	Gender	Female	Tenure (mo.)	239
Usage Freq.	14	Support Calls	5	Payment Delay	18
Subscription	Standard	Contract	Annual	Total Spend	\$932
Last Interaction	17				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #24 — 2026-05-16 15:38:40

Selected Model		KNN		Prediction	Likely to Churn
Probability		60.0%		Risk Level	Medium
Age	30	Gender	Female	Tenure (mo.)	239
Usage Freq.	14	Support Calls	5	Payment Delay	18
Subscription	Standard	Contract	Annual	Total Spend	\$932
Last Interaction	17				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
- Offer flexible payment options or a one-time late fee waiver.

Prediction #25 — 2026-05-16 15:36:07

Selected Model		KNN		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	23	Gender	Female	Tenure (mo.)	23
Usage Freq.	12	Support Calls	3	Payment Delay	0
Subscription	Standard	Contract	Quarterly	Total Spend	\$234
Last Interaction	1				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.

Prediction #26 — 2026-05-16 15:35:52

Selected Model		Naive Bayes		Prediction	Likely to Stay
Probability		0.2%		Risk Level	Low
Age	23	Gender	Female	Tenure (mo.)	23
Usage Freq.	12	Support Calls	3	Payment Delay	0
Subscription	Standard	Contract	Quarterly	Total Spend	\$234
Last Interaction	1				

Retention Suggestions

- Customer is currently happy. Maintain regular positive engagement.

Prediction #27 — 2026-05-16 15:35:35

Selected Model		KNN		Prediction	Likely to Churn
Probability		100.0%		Risk Level	High
Age	23	Gender	Female	Tenure (mo.)	23
Usage Freq.	12	Support Calls	3	Payment Delay	0
Subscription	Standard	Contract	Quarterly	Total Spend	\$234
Last Interaction	1				

Retention Suggestions

- Improve customer support experience - follow up on recent support tickets.
